## **DETAILED ACTION**

### ***Withdrawn rejections***

Applicant's amendments and arguments filed 12/17/2009 are acknowledged and have been fully considered and were found convincing. Any rejection and/or objection not specifically addressed below is herein withdrawn. A new rejection is herein set forth.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Peterson, JR. et al. (US 2001/0044393).

Peterson, JR. et al. discloses an antimicrobial compositions comprising nonionic surfactant preferably an alkyl polyglucoside and a polyol, preferably selected from hydrogenated starch hydrolysate [0011]. Table 1 teaches the formulation comprises 2-10% of the nonionic surfactant and 1-10% of the polyol. The claim recites the limitation that the composition is a pesticide for controlling insects and plant pathogens. It is the Examiners position that an antimicrobial constitutes a subgenus of pesticides. Applicants' recitation of "for controlling insects and plant pathogens" has been interpreted as intended use.
